DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-11 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Application Publication 2004/0011322 to Gerhardt. Gerhardt teaches an engine having two embodiments one having port fuel injection, the other being direct fuel injection. In each of these two embodiments certain cylinders may be disabled by shutting of the intake and exhaust valves. See the abstract, paragraphs 4-7, 17,20,23,24,41,43,48 and 54.

2. Claims 9 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6636797 to Yoshizawa et al This reference teaches a directly fuel injected engine which may operate in either a lean stratified mode or stoichiometric homogeneous mode.
